RESEARCH EXPERIENCE

University of Texas Southwestern Medical Center

Purified Gz-GTPase Activating Protein and explored kinetics of Gz and GTPase Activating Protein from July 1994 to June 1995

Medical College of Wisconsin

Explored role of ubiquitin in degenerative neuronal diseases and discovered interaction sites during the summer of 1993

Medical College of Wisconsin

Conducted a pilot study to elucidate role of ubiquitin in ischemia-reperfusion injury in myogenic cells during the summer of 1992

Oak Ridge National Laboratory

Confirmed the feasibility of employing synchronous fluorescence as a screening method for rapid detection of organic contaminants in well water during the fall semester of 1990

University of Texas Southwestern Medical Center

Synthesized, purified, and characterized a fluorescent adrenergic ligand for fluorescence recovery of photo-bleaching during summer of 1990

Marshfield Research Foundation

Developed method for C-terminal analysis of angiotensinogen during summer of 1989
